25X1

1. Armored Corps Information.

- a. The Hungarian Army does not possess assault guns of 105 mm. caliber.
- b. Firing ranges suitable for use by tanks are at Kecel, at Örkény, at Diósjenő, and at Hajmasker.
- c. The changes and improvements made on the T-34 tank are as follows:
 - 1) The present track will be replaced by another having a width of 65 cm., produced in the Rakosi Mátyás Works, Budapest.
 - 2) The T-34 will be provided with glacis plates (Vorsatzplatten) which are now in production and which will have a thickness of 100 mm., and which will be removable.
 - 3) The 76.2 mm. guns will be replaced with others of 85 mm. caliber.

2. Signal Equipment.

- a. The R-20 sets are merely R-1 sets modernized by the application of a high antenna. The speaking range has been increased up to 3 km. and the transmission by Morse up to a distance of 30 km. This set, as a rule, is used on company level.
- b. The R-3 sets are used at battalion headquarters. The speaking range for this type, under particularly favorable conditions, is 35-40 km. Using the Morse system, the range is 100 km.
- c. The R-4 and R-5 sets are used by tanks and employ rod antennas (Stockantenne). Their range is the same as that of the R-3 type, above.
- d. The R-7/48 sets are used by higher headquarters. The speaking range is about 100 km. There appears to be no limit for the Morse-type of transmission.
